

**WeRoam reaffirms its presence in Japan signing up with BB Mobilepoint**

*The recent launch of the BB MOBILEPOINT network in Japan provides nationwide access to more than 3400 hotspots in airports, hotel and restaurant locations.*

Bern, Switzerland, 16 November 2005. WeRoam, the Swiss based wholesale WLAN broker, has signed a roaming agreement with JAPAN TELECOM's BB MOBILEPOINT Wi-Fi network, the new joint brand of SoftbankBB Yahoo!BB Mobile and Japan Telecom's MOBILEPOINT. With this partnership broadband wireless Internet access in a key country for Asian business is available to all WeRoam customers joining the open WLAN roaming platform.

One of the largest hotspot networks in Japan, BB MOBILEPOINT's footprint covers airport locations, hotels and restaurants including McDonald's, All Nippon Airways (ANA) airport lounges and hotels in major cities of the country. Nationwide deployment of McDonald restaurants will start December 1<sup>st</sup> 2005. The network merger extends the existing SoftbankBB Yahoo!BB Mobile coverage that WeRoam users had enjoyed in Tokyo's Narita International airport and now also spreads across main Japan Railway (JR) station areas added through Japan Telecom's hotspots.

"The agreement with BB Mobilepoint is of strategic importance to WeRoam" said Toni Stadelmann, CEO of WeRoam. "It reflects our ambition to continuously expand our Asian hotspot coverage, offering comprehensive Wi-Fi access at premium locations for our global roaming clients."

"The roaming agreement between JAPAN TELECOM CO., LTD and WeRoam is very synergetic. We look forward to having more foreign customers enjoy the broadband environment in Japan." said Keisuke Nakamura, General Manager, JAPAN TELECOM CO., LTD.

**About WeRoam**

Established in 2001 and owned by TOGEWA Holding, WeRoam is the trading name of Swiss company TOGEWANet AG. WeRoam specialises in wholesale mobility management and roaming solutions for the fixed and mobile telecommunications sector.

WeRoam's patented open roaming platform currently connects over 40 Wireless Internet Service Provider networks (WISPs) with a number of the world's leading GSM and Enterprise Remote Access Providers, offering an aggregated footprint of more than 14.000 hotspots. WeRoam is a market leader in SIM based authentication for WLAN.
