WeRoam partners with BOZII to expand its WLAN Footprint

BOZII expands its clients worldwide Public WLAN access, based on WeRoam's Roaming Platform and international HotSpot Footprint.

Bern, August 3th 2006 — WeRoam, the leading aggregator of Public WLAN roaming and provider of enabling solutions, announces its Roaming Partnership with BOZII, the Wi-Fi Roaming specialists based in the UK, to enable BOZII to enlarge its international WLAN roaming service to their business customers.

BOZII will connect to the WeRoam Network using Aramova's smart client solution or easy User ID/Password authentication. Aiming at offering a reliable and efficient business solution that fully integrates into their existing infrastructure, BOZII decided to rely on WeRoam's experience and proven services for WLAN Roaming. "WeRoam's wholesale products are designed to easily and cost-efficiently integrate with Service Provider operations and strategy; thus increasing the revenue potential of the existing and future customer base," said WeRoam CEO, Toni Stadelmann. "We are pleased that BOZII has proven the vision of our concept by selecting our services."

A simple connection between the Roaming Platform and BOZII's network structure opens up increased international roaming access for BOZII's customers to 60 new WISP networks, with an available footprint of 21,000+ available venues for Public WLAN access. All existing Roaming, Billing and Clearing procedures are supported without further adaptations. "WeRoam is keen to support BOZII's mission in enhancing corporate productivity by delivering simple, secure, and ubiquitous connectivity to remote and mobile employees" said Paul Harper, WeRoam's Sales Director.

"We are really pleased to have entered into this relationship with WeRoam as it significantly improves the network available to our customers." said *Quentin Birchall, BOZII's Managing Director,* "We are particularly pleased with the quality of WeRoam's network as the quality of

hotspot locations is a key factor in customer's selection of a Wi-Fi service provider. The integration of the network to our service has gone very well and we are impressed with the effective way in which it has been managed."

###

About WeRoam

Established in 2001, WeRoam is the trading name of Swiss company TOGEWANet AG. WeRoam specialises in wholesale mobility management and roaming solutions for the fixed and mobile telecommunications sector.

WeRoam's patented open roaming platform currently connects over 60 Wireless Internet Service Provider networks (WISPs) with a number of the world's leading GSM and Enterprise Remote Access Providers, offering an aggregated footprint of more than 21.000 hotspots. WeRoam is a market leader in SIM based authentication for WLAN. Responding to the new trends towards convergence, the innovative sister company Comfone launched 2006 the Comfone wVoIP service, which combines all the advantages of GSM together with wireless VoIP functionality.
