WeRoam: worldwide coverage up by 81% in last 6 months, over 20'000 WLAN hotspots live today!

Founded in 2001, WeRoam is reinforcing its position as leading aggregator in the public WLAN industry with the steady growth of its international hotspot footprint

Bern, May 15, 2006 — To date, WeRoam has signed up 53 network partners to its neutral and open roaming platform and over the last six months has increased its hotspot footprint by adding 9'500 new venues. Its coverage now spans over 53 countries. 96% of all hotspots support the WISPr industry standard, simplifying broadband wireless internet access for travelling users.

The WeRoam footprint is composed of quality venues covering 260 airports, 2042 business centres, 5596 hotels and 5290 restaurants. Air passengers have Internet access in major airline hubs like London Heathrow, Paris Charles de Gaulle and Orly, Tokio Narita, Atlanta Hartfield, New York JFK and Chicago O'Hare. Business travellers enjoy the freedom of wireless connections during their stay in selected hotels from leading brands like Hilton, Marriott, Radisson, Sheraton, Shangri-La and Sofitel.

The WeRoam roaming service is today trusted by leading tier 1 providers: ATT, Orange France and VimpleCom to name a few. The success of the WeRoam service lies in the quality of its hotspot coverage and in the ease of integrating WeRoam's WLAN offering into existing mobile data bundles from Internet service providers and GSM operators.

"We are proud to have reached the benchmark of 20'000 live hotspots. Our strategy to enable and certify WISPr and EAP-SIM across the whole network is paying off. The recent integration of the ATT Global Network Client demonstrated the power of this open standard." said WeRoam CEO, Toni Stadelmann.

###

About WeRoam

Established in 2001 and owned by TOGEWA Holding, WeRoam is the trading name of Swiss company TOGEWANet AG. WeRoam specialises in wholesale mobility management and roaming solutions for the fixed and mobile telecommunications sector.

WeRoam's patented open roaming platform currently connects over 50 Wireless Internet Service Provider networks (WISPs) with a number of the world's leading GSM and Enterprise Remote Access Providers, offering an aggregated footprint of more than 20.000 hotspots. WeRoam is a market leader in SIM based authentication for WLAN.
