WAYPORT AND WEROAM ANNOUNCE WI-FI ROAMING AGREEMENT IN HERTZ AIRPORT LOCATIONS

Austin, Texas - Jan. 16, 2007 -- Wayport, Inc., an international leader in the design and integration of applications and software over wired and wireless carrier grade networks, announced today the expansion of its existing roaming agreement with WeRoam, a leading wholesale aggregator of public WLAN roaming. The amendment will enable WeRoam customers to access Wayport's Wi-Fi high-speed Internet access in 39 Hertz airport locations in the U.S.

"The expansion of our roaming agreement with WeRoam to include our Hertz locations further strengthens the commitment we have made to our neutral-host strategy and partner venues," said Dave Vucina, CEO of Wayport. "By opening up our network to key global industry players such as WeRoam, Wayport continues to build strong relationships with our strategic partners that are beneficial to all parties in the business value chain."

WeRoam Wi-Fi users currently have access to Wayport's extensive network of hotel properties and select airports. Now WeRoam customers will gain the advantage of staying connected to email and the Internet in the Hertz rental facility and in the #1 Club Gold parking spaces.

"Our alliance with Wayport allows us to offer our customers strategic access to premier brand venues like Hertz and many others. WeRoam aims to consistently improve roaming coverage, quality and availability of the WeRoam aggregated Wi-Fi network and we are pleased to expand our existing relationship with Wayport," said Toni Stadelmann, Vice Chairman of WeRoam.

About Wayport, Inc.

Building on its established network infrastructure encompassing more than 13,000 locations in 32 countries, Wayport designs, develops and enables software and applications over carrier grade networks for innovative organizations in a number of vertical markets encompassing retail, healthcare, hospitality, managed services and others. Wayport helps organizations attract and retain loyal customers, create new business capabilities and improve operational efficiencies at premier venues including major hotels, airports, McDonald's and Hertz locations, and other retail brands worldwide. About WeRoam

WeRoam is a trademark of Swiss company Comfone AG and specializes in wholesale mobility management and roaming solutions for the fixed and mobile telecommunications sector. WeRoam's patented open roaming platform connects to nearly 60 WISPs and offers an aggregated footprint of more than 23,000 hotspots. All solutions easily integrate with existing products of Internet, Enterprise, GSM and VoIP service providers. Comfone provides roaming services to over 300 operators in 125 countries worldwide. Its services portfolio includes signaling, data, clearing, hubbing and convergence services.

Responding to the new trends towards convergence, Comfone launched 2006 the Comfone wVoIP service, which combines all the advantages of GSM together with wireless VoIP functionality. Learn more about WeRoam at www.weroam.com.
